SUMMARY

Business-minded **Data Analyst** with a strong analytical and problem-solving mindset. Skilled at turning complex data into **clear insights, identifying business patterns and risks, and supporting data-driven decisions**. Hands-on with SQL, Python, Excel, Power BI, and Tableau, with a focus on solving the **business problem behind the data**, not just analyzing numbers.

VIRTUAL EXPERIENCE

Deloitte Data Analytics — Forage Job Simulation

Completed a Deloitte Data Analytics job simulation using Tableau to analyze business data, identify key patterns and trends, and communicate actionable insights. Developed practical skills in data interpretation, dashboarding, and business-focused analysis, which can be applied in corporate roles to build stakeholder-ready dashboards, track KPIs, and support data-driven decision-making.

Tata GenAI-Powered Data Analytics — Forage Job Simulation

Completed a Tata GenAI-powered Data Analytics job simulation, exploring how Generative AI can be integrated with data analytics to solve business problems and improve analytical efficiency. Developed practical skills in AI-assisted data analysis, insight generation, and business problem-solving, learning to combine GenAI capabilities with data-driven analysis to generate faster and more meaningful insights.

EDUCATION

Bachelor of Science

Vikram Univercity,Ujjain,Madhya Pradesh

06/2022 – 06/2025

SKILLS

- SQL
- Excel
- Power Bi
- Tablue

CERTIFICATES

- Data science and Analytics
- Delloit-Data Analytics Virtual Internship
- Tata-Gen AI Powered Data Analytics

PROJECTS

HR Attrition Analysis 🔗

Analyzed employee data to identify key drivers of attrition, workforce trends, and high-risk employee segments. Built an interactive Power BI dashboard with KPIs and visualizations to help HR teams understand turnover patterns and support data-driven retention strategies.

Job Market Analysis 🔗

Analyzed the 2025 job market to identify in-demand roles, skills, salary trends, and hiring patterns. Used data analysis and visualization to uncover industry trends and understand the skills most sought after by employers.

Hospital Data Analysis 🔗

Analyzed hospital data using SQL to extract and analyze patient, admission, medical condition, treatment, and hospital-related information. Wrote SQL queries using filtering, aggregation, joins, grouping, and subqueries to identify key trends and generate meaningful insights for healthcare decision-making.

Website User Interaction Analysis 🔗

Analyzed web data to understand user interaction and engagement patterns, identifying trends in user behavior, activity, and interactions across the platform. Used data analysis techniques to uncover actionable insights that can help improve user engagement and overall digital experience.
